

Norfolk

The Norfolk is made from robust glass fibre reinforced concrete and features strong straight lines for a contemporary look. Imperfectly gorgeous with a sculptural, tactile effect, glass fibre reinforced concrete is frost resistant, easy care and low maintenance. Its unique construction gives it incredible durability in the harsh New Zealand climate and means that it doesn't weigh as much as traditional concrete, making it sturdy against any wind speed yet light weight enough to move around when required. A food safe water-based sealer protects the surface, limiting staining and scratching.
