

Oakham/Dakota

The Portico Oakham and Dakota outdoor stools are made from robust glass fibre reinforced concrete and features strong angular lines for a contemporary look. Imperfectly gorgeous with a sculptural, tactile effect, glass fibre reinforced concrete is frost resistant, easy care and low maintenance. Their unique construction gives it incredible durability in the harsh New Zealand climate and means that they don't weigh as much as traditional concrete, making it sturdy against any wind speed yet light weight enough to move around when required.
