

# Traffic Management Builds:

TruGroup is a traffic management business. We operate sites, we manage fleets, and we understand the daily demands placed on traffic management vehicles because we place those same demands on our own. When the equipment available in the market didn't meet our operational standards, we built better. That's how this range started, and that hands on operational reality still drives every design decision we make.

Whether you're an established traffic management operator refreshing your fleet, or new to traffic management and working out what you need, these trucks were designed from the inside out.

## All our builds include:

Overhead beacon

---

Front & rear LED flashers

---

Rear deck work lights

---

Reverse/deck camera

---

Handbrake alarm wired to horn

---

Reverse alarm

---

Sandblast decks, anti-rust prime, and topcoat specification JW 180123A to match cab

---

Grip deck

**We work across all major cab and chassis platforms and carry strong procurement relationships with leading truck brands.**

# Workhorse Series

Not every job looks the same. The Workhorse Series is built around that reality. At the centre of the Workhorse is an interchangeable pod system that lets you configure the vehicle to match your daily operational requirement, without changing your truck. Sandbag bins, MTC boxes, or other modular components can be swapped in and out, meaning one vehicle can support multiple site setups across a working week.

It's a single cab platform that punches above its weight. Compact enough to work efficiently on site, adaptable enough to handle the changing demands of a TM operation, and built to the standard you would expect from a team that runs the same equipment themselves.

For operators who need a reliable, hard working TM truck without the complexity of a larger platform, this is it.

## Features

Certified fall arrest

Level 1 capability

Galvanised signs rack

MTC box

Interchangeable pods

Arrowboard/TMVMS
