

Traffic Management Builds:

TruGroup is a traffic management business. We operate sites, we manage fleets, and we understand the daily demands placed on traffic management vehicles because we place those same demands on our own. When the equipment available in the market didn't meet our operational standards, we built better. That's how this range started, and that hands on operational reality still drives every design decision we make.

Whether you're an established traffic management operator refreshing your fleet, or new to traffic management and working out what you need, these trucks were designed from the inside out.

All our builds include:

Overhead beacon

Front & rear LED flashers

Rear deck work lights

Reverse/deck camera

Handbrake alarm wired to horn

Reverse alarm

Sandblast decks, anti-rust prime, and topcoat specification JW 180123A to match cab

Grip deck

We work across all major cab and chassis platforms and carry strong procurement relationships with leading truck brands.

AWVMS Ute

Our Advanced Warning Variable Message Sign system. Whether meeting compliance obligations or just keeping both workers and motorists safety in mind, the AWVMS mounted to a Ute is the perfect addition to any fleet.
