

Traffic Management Builds:

TruGroup is a traffic management business. We operate sites, we manage fleets, and we understand the daily demands placed on traffic management vehicles because we place those same demands on our own. When the equipment available in the market didn't meet our operational standards, we built better. That's how this range started, and that hands on operational reality still drives every design decision we make.

Whether you're an established traffic management operator refreshing your fleet, or new to traffic management and working out what you need, these trucks were designed from the inside out.

All our builds include:

Overhead beacon

Front & rear LED flashers

Rear deck work lights

Reverse/deck camera

Handbrake alarm wired to horn

Reverse alarm

Sandblast decks, anti-rust prime, and topcoat specification JW 180123A to match cab

Grip deck

We work across all major cab and chassis platforms and carry strong procurement relationships with leading truck brands.

Superhighway Series

Built for high volume level 2 traffic management operations, the Superhighway carries significantly more equipment than a standard TM truck, with capacity for up to 32 crow's feet compared to the 14-16 carried by most builds in the range. For operators running large or complex sites where equipment volume is the limiting factor, that difference is material.

The adjustable sign rack accommodates both level 1 and level 2 signs without modification, keeping the vehicle operationally flexible across different job types. And where most trucks require crew to step into the live lane to access stands, the Superhighway's walk through design keeps your team on the safe side of the barrier, every time.

Built for 3850mm wheelbase crew cab applications, this is the build for operators who've outgrown standard gear capacity and need a platform that keeps pace with the scale of their operation.

Features

Level 1/Level 2 capability

Galvanised adjustable signs rack stand holders

Certified fall arrest

x2 Crows feet box

Arrowboard/TMVMS
