

# Traffic Management Builds:

TruGroup is a traffic management business. We operate sites, we manage fleets, and we understand the daily demands placed on traffic management vehicles because we place those same demands on our own. When the equipment available in the market didn't meet our operational standards, we built better. That's how this range started, and that hands on operational reality still drives every design decision we make.

Whether you're an established traffic management operator refreshing your fleet, or new to traffic management and working out what you need, these trucks were designed from the inside out.

## All our builds include:

Overhead beacon

---

Front & rear LED flashers

---

Rear deck work lights

---

Reverse/deck camera

---

Handbrake alarm wired to horn

---

Reverse alarm

---

Sandblast decks, anti-rust prime, and topcoat specification JW 180123A to match cab

---

Grip deck

**We work across all major cab and chassis platforms and carry strong procurement relationships with leading truck brands.**

# Super Sealer Series

Sealing and road maintenance operations don't stop. They move continuously, at volume, across long stretches of road where equipment demands are relentless and resupply isn't an option. The Super Sealer Series was purpose built for exactly that environment.

With capacity for up to 100 level 1 stands, this is the highest volume equipment carrier in the TM range. Easy access sandbag bins keep the operation moving without unnecessary downtime, and the deck layout is designed around the reality of constant deployment and retrieval across a full working day.

Built for 4300mm wheelbase crew cab applications and available in arrowboard or TM-VMS configuration, for sealing crews and road maintenance operators who need a TM truck that keeps pace with the job, this is the build.

## Features

High Level 1 stand capability of 100+

Certified fall arrest

Galvanised sign racks

Arrowboard/TMVMS
