

# Traffic Management Builds:

TruGroup is a traffic management business. We operate sites, we manage fleets, and we understand the daily demands placed on traffic management vehicles because we place those same demands on our own. When the equipment available in the market didn't meet our operational standards, we built better. That's how this range started, and that hands on operational reality still drives every design decision we make.

Whether you're an established traffic management operator refreshing your fleet, or new to traffic management and working out what you need, these trucks were designed from the inside out.

## All our builds include:

Overhead beacon

---

Front & rear LED flashers

---

Rear deck work lights

---

Reverse/deck camera

---

Handbrake alarm wired to horn

---

Reverse alarm

---

Sandblast decks, anti-rust prime, and topcoat specification JW 180123A to match cab

---

Grip deck

**We work across all major cab and chassis platforms and carry strong procurement relationships with leading truck brands.**

# TM Ute

The most agile addition to any traffic management fleet. Built for the daily demands of traffic management operations, the TM Ute delivers crew and equipment to site efficiently, without the overhead of a full truck. A cost effective solution for operators who need a reliable, hard working vehicle that is ready when the job is.

## Features

Level 1 signs compartment in headboard

Moveable partitions with embedded L1 stand capability

Towbar
