

SKS
Indigenous
Technologies

SKS Indigenous Technologies is a majority Indigenous owned technology company providing comprehensive audio visual, communications and electrical solutions across Australia.

SKS Indigenous Technologies operates as a joint venture with SKS Technologies Group, leveraging the group's established infrastructure, expertise, and national footprint to deliver high quality services while maintaining a focus on indigenous engagement.

SKS Indigenous Technologies is committed to closing the gap and promoting reconciliation through economic independence and employment opportunities.

**Munarra Centre for
Regional Excellence**

Ⓢ \$1.5M

Why Engage with SKS Indigenous

Partnering with SKS Indigenous Technologies means your procurement dollars directly support economic independence for Aboriginal and Torres Strait Islander peoples.

» Purpose Driven Partnership

SKS Technologies and SKS Indigenous Technologies have aligned values to create opportunities for Indigenous Australians to gain an education and employment.

» Proven Impact

Over \$7M injected into Indigenous households and 40 staff recruited nationally. For every dollar of revenue, Indigenous businesses create \$4.41 of economic and social value.

» Leadership With Vision

Led by Chris Johnson, proud Gunditjmara and Wiradjura man, committed to empowering the next generation.

» Future Focused

Goal to operate with a 100% Indigenous workforce, creating long term career pathways. SKS Group provides apprentices and school based apprenticeships nationally.

» Community Engagement

SKS Indigenous Technologies is proud to support charitable initiatives that foster community wellbeing, including AFL Cape York, Koorie Academy Basketball, Western Victorian Eels Sporting Club, Fitzroy Stars Football Club and Djookyaans Netball team.

» Supply Nation Certified

This certification guarantees authenticity and measurable economic impact through job creation.

Our Approach to Sustainability

We are committed to driving measurable environmental impact in technology.

» Technology Sustainability by Design

We avoid over specification, select energy efficient technology, and right size every solution to reduce ongoing power draw and carbon impact.

» Circular Economy and Lifecycle Strategy

We design for reuse and modular upgrades, with a clear pathway for repurposing equipment and managing end-of-life responsibly through certified recyclers.

» Operational Energy Reduction

Our smart workplace systems use scheduling, power saving modes, and device consolidation to optimise energy use and reduce operating footprint.

» ESG Reporting Support

We provide full visibility of installed tech, expected lifespan, and upgrade paths to support Scope 2 and 3 emissions reporting under ESG frameworks.
